11 HOW TO BOOK

This publication shows products from Ecophon product range and those of other suppliers. The specifications are intended to provide a general guide to which products are most suitable for the preferences indicated. Technical data is based on results obtained under typical testing conditions or long experience in normal conditions. The specified functions and properties for products and systems are only valid on condition that instructions, installation diagrams, installation guides, maintenance instructions and other stated conditions and recommendations have been taken into consideration and followed. Deviation from this, such as changing specific components or products, will mean that Ecophon cannot be held responsible for the function, consequences and properties of the products. All descriptions, illustrations and dimensions contained in this brochure represent general information and shall not form part of any contract. Ecophon reserves the right to change products without prior notice. We disclaim any liability for misprints. For the latest information go to www.ecophon.com/uk or contact your nearest Ecophon representative.

Sound of nature

IN EVERYDAY LIFE

Saint-Gobain Ecophon contributes to good indoor environments for working, healing and learning. We do this by developing, manufacturing and delivering acoustic products and systems designed around the natural evolution of human hearing.

Having a sound effect on people, in every way we can, is what we do proudly. That promise makes every one of us a passionate advocate for the importance of room acoustics to people's wellbeing – whatever the space, activity or need.

ECOPHON TRAINING ACADEMY

As new and innovative products are developed to meet regulatory requirements and industry building methods, so does the need to continuously develop training content and delivery. Saint-Gobain Ecophon are proud to offer a range of courses for installers and students who are looking to enhance their knowledge on Ecophon ceiling and wall systems.

Introduction to Ecophon Systems

COURSE OBJECTIVE

Introduction to Ecophon ceiling and wall systems, this course includes both theory and practical elements.

COURSE CONTENT

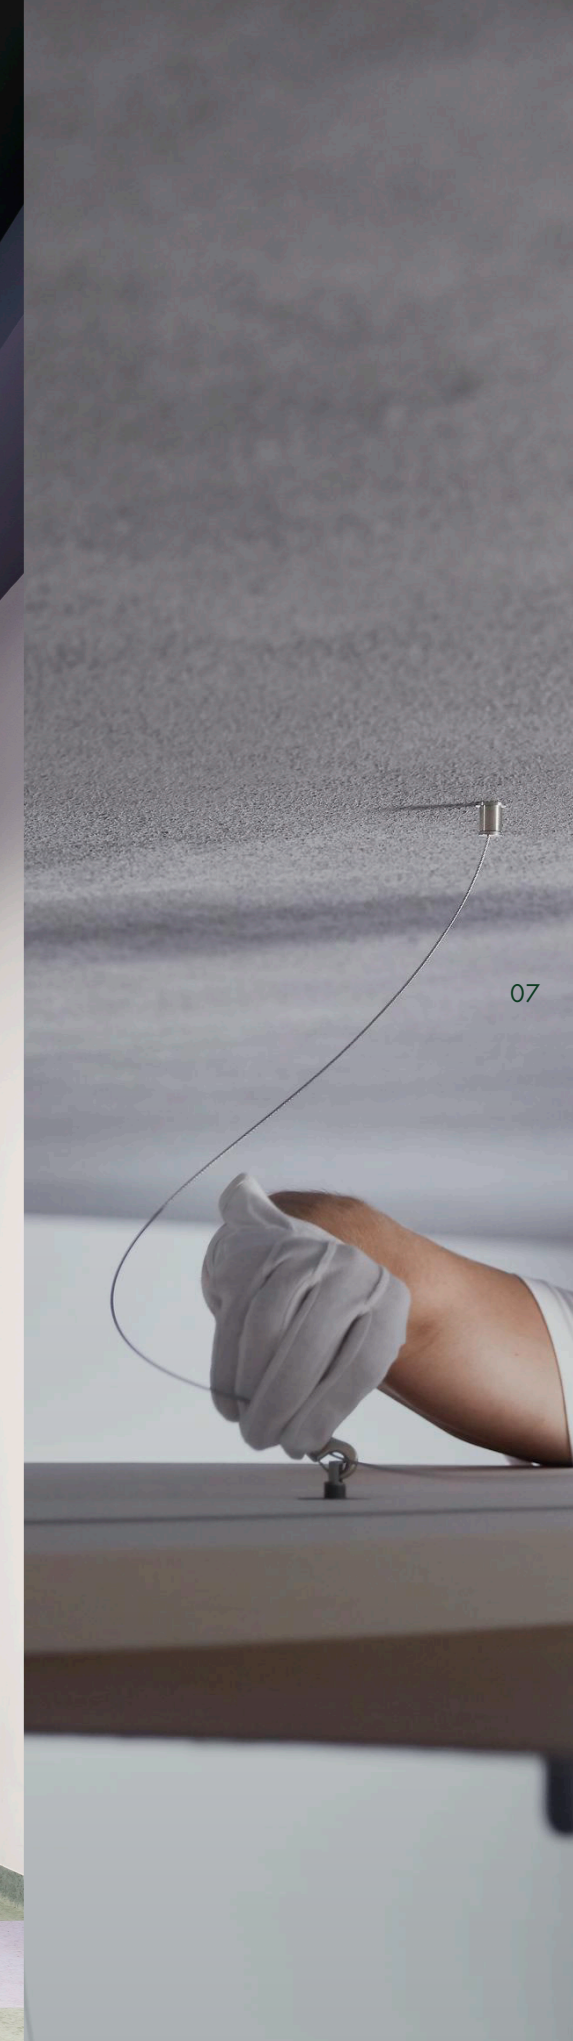

- The importance of Health & Safety
- Develop an understanding of the Ecophon range of systems used in construction in market segments
- An introduction to Ecophon edge details and basic suspension systems
- Product ranges covered, Akusto wall and Solo ceiling, with a brief look at Solo Matrix and Focus Ds

COURSE TIMING

This is a one day course, starting at approx. 9.30am and concluding at 4.00pm.

EVIDENCE TOWARDS QUALIFICATIONS

Certificates are issued on completion of the course.

Advanced Ecophon Systems

COURSE OBJECTIVE

Further develop knowledge and practical skills related to the installation of Ecophon ceiling and wall systems.

COURSE CONTENT

This course covers everything in the Introduction as well as an indepth look at:

- High impact product range - Super G and Master Rigid A, E & Dp
- Super G Plus A, Hygiene, and Focus
- Grid & corridor systems
- Using edge cutting tools and cutting perimeter tiles

COURSE TIMING

It is suggested that you book this course as 1 and half or 2 days, to allow enough time to have an indepth look at each section.

Days start at approx. 9.30am and conclude at 4.00pm,

EVIDENCE TOWARDS QUALIFICATIONS

Certificates are issued on completion of the course.

Bespoke packages

TAILORED TO PRACTICAL LEARNING

Whether you have completed a training course with Ecophon before or not, a bespoke package can be created for you.

In these packages you have full control of duration and topics, if you are looking for training on a specific product range for a project or if you just want to brush up your skills.

Bespoke packages can also offer on site training if required.

To book training courses contact us by Telephone or Email, with your chosen package and preferred dates

Ecophon is the leading supplier of indoor acoustic solutions that improve working performance and quality of life. We believe in the difference sound can make to our everyday lives, and are passionate advocates for the importance of room acoustics to people's wellbeing – whatever the space, activity or need.

Having a sound effect on people is the principle that guides all we do. We're proud of the Swedish heritage and human approach that promise is founded on. Our uncompromising commitment to transparent sustainable practice, and, as members of the Saint-Gobain Group, to be doing our part in making the world a better home.
