AKUSTO™

Exploring a vertical art variety

A sound effect on people

Saint-Gobain Ecophon contributes to good indoor environments for working, healing and learning. We do this by developing, manufacturing, and delivering acoustic products and systems designed around the natural evolution of human hearing – replicating the outdoor sound experience indoors, because that's just better for people. Having a sound effect on people, in every way we can, is what we do proudly. That promise makes every one of us a passionate advocate for the importance of room acoustics to people's wellbeing – whatever the space, activity or need.

Good acoustics matter everywhere

The importance of acoustics is underappreciated. Sound impacts us in daily life, and the scientific support for improving our indoor sound environments is welldocumented.

And what exactly is an ideal indoor sound environment for people? One based on how we experience sound outside. The human auditory sense is naturally adapted to an outdoor environment where there is not any sound reflections from ceilings and walls.

That's why most of what we do at Ecophon is about replicating the acoustic qualities found in nature for indoor environments. We want to optimise indoor spaces to our natural way of hearing, so that speech and sound is easy to hear and understand, when needed, improving performance and wellbeing.

Usually that starts with the ceiling. A wall-to-wall acoustic ceiling is the easiest way to get a large sound-absorbing surface area into a space, and is usually the best way to reduce sound strength, shorten reverberation times, and increase speech clarity and overall hearing comfort.

ECOPHON AKUSTO™

Exploring a vertical art variety

Ecophon Akusto™ is a complement to acoustic ceilings that solves acoustic challenges and allows opportunities to follow current design and installation trends. The panel surface is available in Texona, Super G and Akutex FT.

- Excellent acoustics
- Wall and screen absorbers with many installation solutions
- A vertical solution in a variety of surfaces, colours and shapes

When designing a space for optimal acoustic performance, a sound-absorbing ceiling is the first priority – but bare walls will still create echoes. Akusto panels will solve this by absorbing sound and give clearer speech, lower sound strength, reduce sound propagation and take away flutter echoes.

With Akusto, it is easy to create workplaces where people feel good and can perform at their very best.

Product range

ECOPHON AKUSTO™

Akusto gives you many ways to individualise your acoustic solution in unique and expressive configurations. Choose Akusto Wall C Extra Bass to get increased speech clarity due to the extra absorption feature for low frequency sounds. Screens are ideal for strategic acoustic performance support. Akusto Screen is light and freestanding, so it can be re-positioned as needed.

12

AKUSTO WALL A
Framed wall panels in wide range of colours.

13

AKUSTO WALL A
Framed wall panels in wide range of colours.

AKUSTO WALL C EXTRA BASS
Shadow framed low frequency wall panel
solution in wide range of colours.

14

AKUSTO WALL C
Smoothly framed wall panel solutions in wide range
of colours.

AKUSTO WALL C
Smoothly framed wall panel solutions in wide range
of colours.

15

16

AKUSTO FREEDOM
Custom-made framless wall panel solutions with a wide range of color possibilities.

Custom shapes and endless patterns

Unique is the new standard

Create striking shapes and a gentle sound environment with Akusto wall panels. Draw your own custom shapes with Akusto Freedom or build one-of-a-kind patterns using Akusto Triangle and Hexagon.

Features

- Unlimited shapes with Akusto Freedom
- Create patterns with Akusto Triangle and Akusto Hexagon
- Hang with Connect™ One Trim or glue directly to the wall
- Create 3D-effect with individual panels standing out
- Superior acoustic qualities

17

AKUSTO TRIANGLE
Frameless wall panel solutions in a wide range of colours.

AKUSTO HEXAGON
Frameless wall panel solutions in a wide range of colours.

AKUSTO ONE
Easy to install frameless wall panels in many shapes and colours.

AKUSTO ONE
Frameless wall panel solutions in a wide range of colours.

AKUSTO SCREEN
Smoothly framed wall panel solutions in wide range of colours.

Ecophon E-tools

Ecophon offers several useful tools and services for the different phases of the building process, from inspiration to specific maintenance instructions for your Ecophon products.

Read more and try our E-tools at www.ecophon.com

Installation methods

The innovative Connect™ accessories enable the wall absorbers to be mounted with a perfect fit and in many different ways. As Ecophon Akusto is designed for flexible placement, the creative ways to arrange them are almost endless.

Ecophon Akusto™ ONE

Connect One Trim is screwed to the wall and holds the Connect Absorber Anchor One, which attaches to the back of the panel. It comes in two versions and creates a 3D effect when combined.

Connect One Fixing is a holder screwed to the wall. The panel is secured with a specially designed, textured button, available in several colours.

Connect One Hook fixing is a plate with hooks which is screwed to the wall and the panel is pressed onto the hooks.

Ecophon Akusto™ Wall

Connect Shadow Profile has a design which creates a shadow effect. The elegant solution gives a light impression and allows you to create fields of colours and patterns both vertically and horizontally.

Connect Thinline Profile is an elegant solution which allows you to create fields of colours and patterns both vertically and horizontally.

Connect WP Profile is a robust profile solution that establishes a distinct frame around the wall panel.

Connect Channel Trim is a simple and functional solution. It can be installed with Connect T24 Main Runners or by using Connect Recessed Profile.

Ecophon Akusto panels contribute to a healthy indoor environment with superior acoustic absorption, low VOC emissions in line with the strictest requirements, and a full chemical transparency with verified Health Product Declarations. The low environmental footprint of our Akusto panels is third-party verified in Environmental Product Declarations.

The products do not contribute to fire and the glass wool core of the Akusto tiles is tested and classified as non-combustible according to EN ISO 1182. Fire classification according to EN 13501-1, see Technical Properties on respectively product.

Note
More product and system information such as installation help and sustainability documentation can be found at www.ecophon.com

Colours and surfaces

Akutex™ FT

The Akutex label guarantees that the product carrying it has a superior surface technology. Our research and development will always focus on visual aspects, acoustic properties, working environment, architectural trends and environmental aspects. This ensures that Akutex is always one step ahead.

System weight: Weight information is indicative and subject to variation. Akusto Triangle: 3,5,

Mechanical properties: No additional live load is allowed.

CE: Ecophon ceiling systems are CE marked according to the European harmonized standard EN13964:2014. CE marked construction products are covered by a Declaration of Performance (DOP) which enables customers and users to easily compare performance of products available on the European market.

Installation diagram in detail www.ecophon.com

Ecophon Akusto™ Hexagon

Acoustic: The values in the diagram refer to a single unit.

Sound Absorption:
Based on test results according to EN ISO 354.

THK mm	o.d.s. mm	A _{eq} Equivalent absorption area per unit (m² sabin)					
		125 Hz	250 Hz	500 Hz	1000 Hz	2000 Hz	4000 Hz
40	43	0.0	0.2	0.4	0.5	0.4	0.3
40	48	0.1	0.2	0.5	0.5	0.5	0.4
40	70	0.1	0.2	0.5	0.6	0.5	0.4

Indoor Air Quality:

Certificate / Label	
Eurofins Indoor Air Comfort®	IAC Gold
French VOC	A+

Cradle to Cradle Certified®: Akusto products with Akutex FT surface are Cradle to Cradle Certified® at Bronze level (version 4.0).

Material Health: Akusto products with Akutex FT surface have received a C2C Certified Material Health Certificate™ at the Silver level (standard version 4.0). The C2C Certified Material Health Certificate™ is a verification of the health and safety of a product’s composition using the Material Health requirements of the Cradle-to-Cradle Certified Product Standard.

Carbon footprint: Life-cycle stages A1 to C4 from EPD, in conformity with ISO 14025 / EN 15804

	kg CO ₂ equiv/m²
Akusto Hexagon	1,43

Circularity: Minimum post-consumer recycled content: 60%, Recyclability: Fully recyclable,

Fire safety: The glass wool core of the tiles is tested and classified as non-combustible according to EN ISO 1182. Europe: EN 13501-1, A2-s1,d0,

Humidity Resistance: Class C, relative humidity 95% and 30°C, according to EN 13964:2014

Visual appearance: Akusto Wall in white has high light reflectance. Light reflectance and nearest NCS colour sample for all the different colours: See Ecophon Colours and surfaces.

Cleanability: Akutex FT: Daily dusting and vacuum cleaning. Weekly wet wiping. For more info see Colours and surfaces.

Accessibility: The tiles are easily demountable except glued installation see quantity specification.

Installation: Installed according to installation diagrams, installation guides and drawing aid. For information regarding minimum overall depth of system see quantity specification. Rendered surfaces must have sufficient strength to be able to carry the load imposed by the tiles. If doubts, test gluing should be carried out. The surface should always be dry and clean. For best result the surface should be even, however an acceptable result could be achieved on slightly uneven surfaces.

Packaging information: Information is indicative and subject to change. 1040x1200x40 : 2,

System weight: Weight information is indicative and subject to variation. Akusto Hexagon: 3,5,

Mechanical properties: No additional live load is allowed.

CE: Ecophon ceiling systems are CE marked according to the European harmonized standard EN13964:2014. CE marked construction products are covered by a Declaration of Performance (DOP) which enables customers and users to easily compare performance of products available on the European market.

Indoor Air Quality:

Certificate / Label

Eurofins Indoor Air Comfort® IAC Gold
French VOC A+

Circularity: *this value does not take into account the aluminium frame Minimum post-consumer recycled content: 48%*, Recyclability: Fully recyclable,

Humidity Resistance: Class A, relative humidity 70% and 25°C, according to EN 13964:2014

Visual appearance: Texona in white has high light reflectance. For more information regarding visual appearance of the various surfaces: See Ecophon Colours and surfaces.

Cleanability: Weekly dusting and vacuum cleaning.

Use of disinfectants: Texona Ginger, Sea salt, Thyme, Oyster and Garlic withstand the frequent use of ethanol (70%)-based disinfectants. Dampen a soft polyester microfiber cloth with the solution and wipe the surface in gentle circular movements.

Installation: Installed according to the installation guide that is delivered with the product.

Mechanical properties: The product is tested according to EN14073-2 and EN1023.

Sustainability

Towards net-zero acoustics

Sustainability is more than a word – it’s a collective movement to protect people and the planet that requires honest commitment and genuine care. That’s why Ecophon is building on better materials, transparency, and principles, to name just a few.

We actively support an industry-wide drive to standardised, easy-access Environmental Product Declarations for individual products, rather than product families. Their inclusion of full lifecycle data,

from raw material sourcing to end of life, rather than only the favourable stages. A move away from self-declared labels, or non-independently verified sustainability claims. And for any promises of net zero carbon emission targets to be validated by the Science-Based Targets initiative.

If we’re going to build a sustainable future, it has to start with an honest approach, high ambition and the best of intentions – to build on better together.

Ecophon is the leading supplier of indoor acoustic solutions that improve working performance and quality of life. We believe in the difference sound can make to our everyday lives, and are passionate advocates for the importance of room acoustics to people's wellbeing – whatever the space, activity or need.

Having a sound effect on people is the principle that guides all we do. We're proud of the Swedish heritage and human approach that promise is founded on. Our uncompromising commitment to transparent sustainable practice. And, as members of the Saint-Gobain Group, to be doing our part in making the world a better home.
