Time to focus
on visual acoustics
Focus on the eye and the ear

Our eyes and ears are the gateways to our minds, and their perceptions affect our wellbeing and productivity. That is why visual and acoustic design are equally important when creating indoor environments.

Ecophon Focus™ caters for both, offering stunning visual acoustics. Delighting the eyes while soothing the ears.

Entering a universe of design flexibility

Ecophon Focus™ is our most comprehensive product family, created with people and their activities in mind. Suspended wall-to-wall ceilings with excellent acoustic properties, appealing looks and the flexibility to suit every need make the Focus family the perfect toolbox.

- 10 edges – offering a wide range of design possibilities
- 11 sizes – allowing you to choose just the right appearance
- 16 colours – a range of natural and attractive colour options
- 3 lighting solutions – optimal integration of exclusive Ecophon lighting
- 6 unique additional solutions – for stylish level changes, wall endings and free-hanging ceilings

Focus on visual design

When entering an indoor environment it’s hard to ignore the visual impression. With roots in Swedish design tradition, Ecophon Focus™ offers a wide range of design options with the flexibility to choose colours, edges, panel sizes, grid visibility and lighting. With Focus it’s easy to create a unique expression perfectly in line with the overall architecture.

Blend in...
Ecophon Focus™ can create a subtle accent, quietly supporting the overall interior design by following the lines and shapes of the room.

...or make a statement
But Ecophon Focus™ can also be bold and brave, by emphasizing colours and lines to create an eye-catching feature in the interior design.

Focus
on acoustic design

People perform very different tasks in an open-plan office, a classroom or a hospital ward. To enable people to perform to the best of their ability, every indoor environment must be designed to suit the designated activity. That’s why Ecophon has developed Activity Based Acoustic Design. By defining the needs from three perspectives, you can find the optimal acoustic solution for every indoor activity and space.

● Activity
What will people do in the space? Computer work, phone calls and team activities all have their own specific prerequisites.

● People
Who are the people performing the activity? The age group, the number of people and any special needs are all factors to consider.

● Space
What are the physical properties of the space itself? It’s size, its location within the building and the building materials used are important aspects to take into account.

Focus on the edge

A total of ten different edge options makes Ecophon Focus™ flexible in terms of design. Edges can be made visible to emphasize the direction of the room or create distinctive patterns, or concealed for a more seamless look.

Focus on size

With Ecophon Focus™ you can choose from eleven different panel sizes. The large sizes are unique on the market and only offered by Ecophon.

Focus
on the grid

Connect™ is Ecophon’s grid system in galvanized steel with excellent load bearing capacity. The different Focus products can make the grid visible, partly visible (recessed) or concealed. Choose from three colours: white, grey and black.

Focus
on colour

Akutex™ FT is a unique and superior surface developed by Ecophon. It has great light reflectance properties and in combination with the glass wool, Akutex™ FT provides optimal acoustics. The updated colour range includes sixteen attractive colours inspired by nature.

The Akutex™ label guarantees that the product carrying it has a superior surface technology. Our research and development will always focus on visual aspects, acoustic properties, working environment, architectural trends and environmental aspects. This ensures that Akutex™ is always one step ahead.
Ecophon is the leading supplier of acoustic solutions. We contribute to healthier indoor environments, improving quality of life, wellbeing and working performance. As evolution has adapted the human senses to a life outdoors, our focus is to bring the ideal acoustic environments of nature into our modern indoor spaces. We know they will have a sound effect on people.

The principles guiding our work are grounded in our Swedish heritage, where a human approach and a common responsibility for people’s lives and future challenges come naturally.

Ecophon is part of the Saint-Gobain Group, a world leader in sustainable habitat solutions. This is also one of the top 100 industrial groups in the world, constantly innovating to make living spaces more comfortable and cost-efficient. Saint-Gobain offer solutions to the major challenges of energy efficiency and environmental protection. No matter what new needs emerge in the habitat and construction markets, the future is made of Saint-Gobain.
